

Active G α_z

Catalog Number: 26908

Gene Symbol: Gnaz

Description: Anti-Active G α_z Mouse Monoclonal Antibody

Background: Heterotrimeric G proteins are critical cellular signal transducers. G α_z represents one sub-family of G proteins that could mediate the inhibition of adenylyl cyclases. Other biochemical and physiological functions of G α_z proteins are being explored.

Immunogen: Recombinant full length protein of active G α_z

Tested applications: IP, IHC

Recommended dilutions:

1 μ g for 1~2 mg total cellular proteins for IP;

1:100 dilution for IHC

Concentration: 1 mg/ml

Host: mouse

Clonality: Monoclonal

Isotype: IgG

Purity: Purified from ascites

Format: Liquid

Storage buffer:

Preservative: no

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 50% glycerol

Species Reactivity: Anti-active G α_z antibody recognizes active G α_z of vertebrates.

Storage Conditions: Store at -20°C. Avoid freeze / thaw cycles

Immunoprecipitation/Western blot

G α_z activation assay. Purified G α_z proteins were loaded as a control (lanes 1) or immunoprecipitated after treated with GDP (lane 2) or GTP γ S (lane 3). Immunoprecipitation was done with the anti-active G α_z monoclonal antibody (Cat. No. 26908). Immunoblot was with an anti-G α_z polyclonal antibody.
